Steve,

Not quite the way I'd put it, but rather amusing (in a concerning sort of way) on the chemicals misidentified in the lawsuit. I'd add that formaldehyde in the air (from construction materials) can enter water samples.

Thanks for forwarding.

Matthew

FYI – thought you would find this interesting. If you read it and note anything that sounds untrue, please let me know.

I was trying to find the article that was referenced in our conversation on Friday regarding formaldehyde. I think the link below may be it

http://pipeline.corante.com/archives/2014/01/30/the_west_virginia_formaldehyde_claim_is_non
